Appendix	. 8		
Order Status	. 8		
Data Customization			

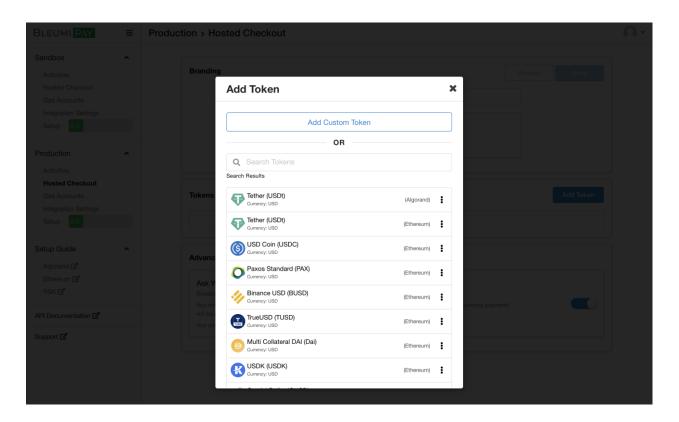

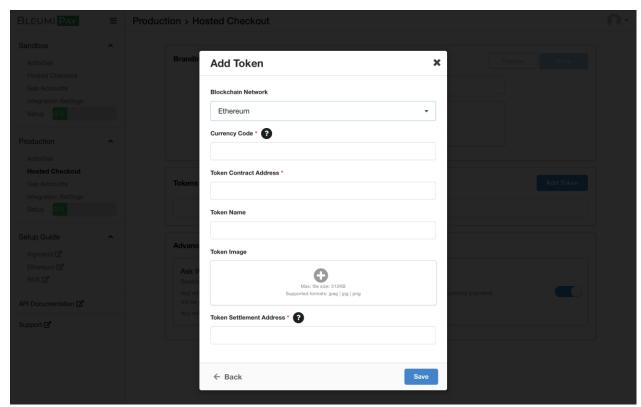

Step 1: Configure Your Bleumi Pay Account

Step 1.1: Setup Hosted Checkout

- 1) Log in to <u>Bleumi Pay Dashboard</u> and navigate to **Sandbox (or) Production > Hosted Checkout**.
- 2) Under **Branding**, customize the Brand Name and Brand Logo to be displayed in the Bleumi Pay Hosted Checkout of your integration.
- 3) Under **Tokens**, click **Add Token** to configure the tokens that you wish to receive as payments from your integration. You can either:
 - a. Add a custom token
 - b. **Select a predefined token** and provide a Token Settlement Address (Your Wallet Address to receive payments).

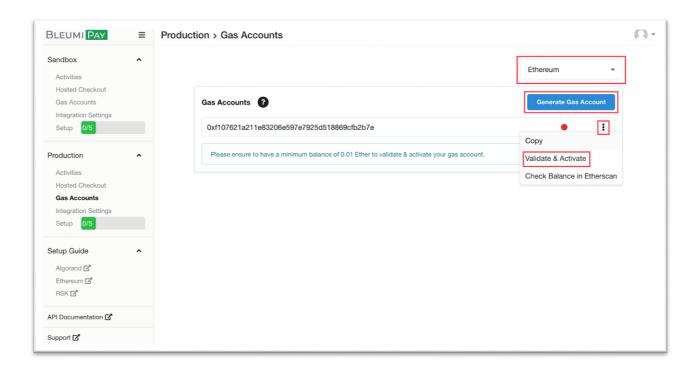

Add a custom token

Step 1.2: Configure Gas Account

Gas Accounts are used to fund Network Fee for your payment operations (Settle/Refund) on the Network.

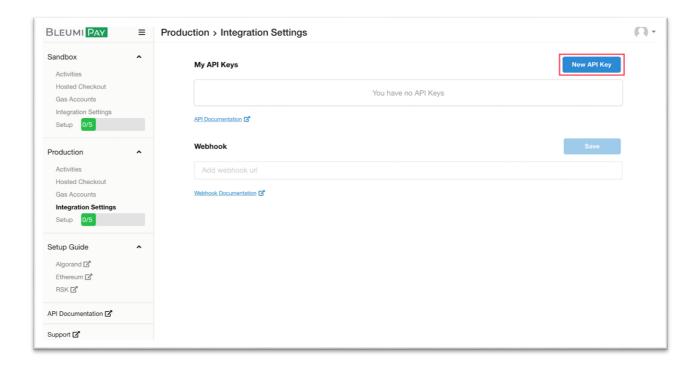

- 1) Log in to <u>Bleumi Pay Dashboard</u> and navigate to **Sandbox (or) Production > Gas Accounts**.
- 2) Select the Network for which the Gas Account needs to be setup.
- 3) Click Generate Gas Account.
- 4) Fund Gas to the Gas Account and click on Validate & Activate to activate the Gas Account.

Step 1.3: Create API Key & Setup Webhook

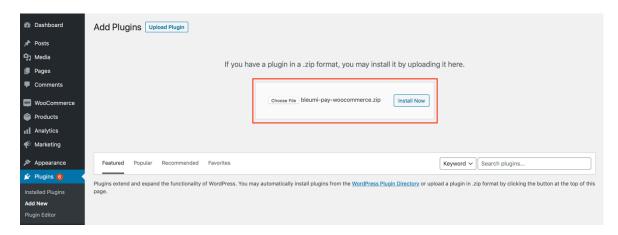

Log in to <u>Bleumi Pay Dashboard</u> and navigate to **Sandbox (or) Production > Integration Settings** and click **New API Key** to create an API Key.

Note: Production network access requires a verified account. To enable production access, contact support@bleumi.com.

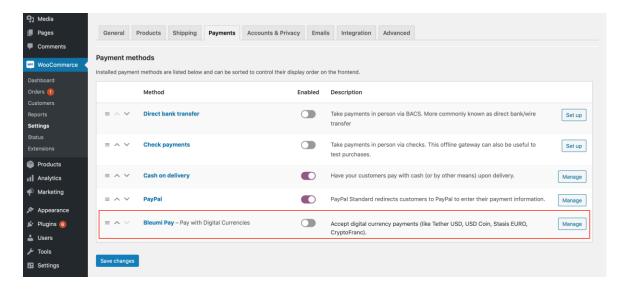

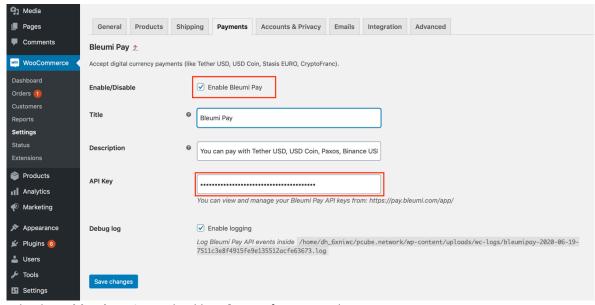

Step 2: Install & Configure Bleumi Pay Extension In Your WooCommerce Store

- 1) Download Bleumi Pay WooCommerce Extension.
- 2) Log in to the WordPress admin panel of your WooCommerce store.
- 3) Navigate to Plugins > Add New and click on Upload Plugin.
- 4) Choose the downloaded plugin release file (bleumi-pay-woocommerce.zip) and click on **Install Now** to add Bleumi Pay as a Payment method on your WooCommerce store.

- 5) Navigate to **WooCommerce > Settings > Payments** and click on **Manage** under **Bleumi Pay** payment method.
- 6) Check Enable Bleumi Pay checkbox.
- 7) Copy and paste your Bleumi Pay API Key from **Bleumi Pay Dashboard > Sandbox (or) Production** > **Integration Settings**.
- 8) And Click **Save** icon to save changes.

Check Enable Bleumi Pay checkbox & Specify your API key

Appendix

Order Status

S. No.	Order Status	Notes	
1	Pending Payment	Order received; no payment initiated. Awaiting payment (unpaid).	
2	Failed	Payment failed or was declined (unpaid). Note that this status may not show immediately and instead show as Pending until verified.	
3	Processing	Payment received (paid) and stock has been reduced; order is awaiting fulfillment. All product orders require processing, except those that only contain products which are both Virtual and Downloadable.	
4	Completed	Order fulfilled and complete – requires no further action.	
5	Canceled	Canceled by an admin or the customer – stock is increased, no further action required.	
6	Refunded	Refunded by an admin – no further action required.	
7	On-Hold	Awaiting payment – stock is reduced, but you need to confirm payment.	
8	Awaiting Payment Confirmation	Digital Currency Payment sent by customer – awaiting for blockchain confirmation. (Bleumi Pay custom status)	
9	Multi Token Payment	Customer has used multiple tokens to pay the order. (Bleumi Pay custom status)
